

I believe in design as an agent for social change and in the public realm as an opportunity for improving quality of life in cities of the developing world. My experience as a designer of both public and private architectural projects gives me the versatility to contribute my skills in very diverse contexts.

Born in Bogota, Colombia. Practicing architect, BArch Universidad de Los Andes, with 13 years of experience and a Masters in Urban Design from UC Berkeley. I believe that both housing and the public realm in cities are fascinating design challenges. I have worked independently in competitions with prizes for a public library, a town square and a park, in different cities of Colombia as a co-founder of the firm Ariporo Ltd. I have done academic research, teaching and have collaborated in firms for high end housing in Colombia and Panama. Photography, writing and graphics enthusiast. Fully bilingual. Fellow of the *Leadership for Bogota* 2015-2016 program. Formerly collaborator for Bogota's Territorial Ordering Plan –POT, in the diagnosis and proposals for the Urban Renovation component in the City Planning Department. During 2018, part of Bogota's Habitat Department, working in the slum upgrading program in urban and rural contexts. Currently professor in undergraduate Architecture: Housing Studio, Universidad de Los Andes.

Education
